PROFILE

Third-year Artificial Intelligence and Data Engineering student at Fırat University. I work primarily with Python and SQL, developing my skills in data preparation, analysis, natural language processing and software development. My interests include Turkish text, document-grounded language models and reliable data workflows.

EDUCATION & TRAINING

Fırat University | 2024 - Present

B.Sc. Artificial Intelligence and Data Engineering (in progress). Coursework and independent practice in programming, data engineering and applied AI.

GoIT - Data Analyst Certificate | Completed

Practical training in SQL, data visualization, KPI analysis and A/B testing, using tools including Power BI, Tableau and Looker Studio.

TECHNICAL SKILLS & INTERESTS

Programming & Data
Python, SQL, C, data preprocessing, web scraping and Git/GitHub.

AI & Natural Language Processing
Turkish text classification, sentiment analysis, RAG fundamentals and LLM API usage. Learning focus: source-grounded responses and retrieval quality.

Data Engineering Fundamentals
Data ingestion, metadata organization and vector-based retrieval.

Analytics & Visualization
KPI analysis, A/B testing fundamentals, Power BI, Tableau and Looker Studio.

Web Development
HTML, CSS, JavaScript, Astro and static deployment with GitHub Pages. Practice in responsive design, accessibility and browser testing.

Tools & Working Practices
Jupyter, pip/Poetry, Docker basics, version control, documentation and software maintenance.
